

Be smart Quality is the reward

SpectraAnalyzer TEXTILE is an analytical instrument.

Ideal solution for routine analysis of major quality parameters wax %, silicone %, lubrication %, etc. for thread, yarn during textile production. SpectraAnalyzer TEXTILE perform the quality analysis within 45 seconds.

Learn more about how SpectraAnalyzer helps produce even better products at, <https://spectraalyzer.com/spectraalyzer/spectraalyzer-textile/>

ACCURATE

Multiple components such as wax %, silicone %, etc. can be analyzed at once with results at par with wet chemistry methods.

MODULAR

The SpectraAnalyzer TEXTILE presents the analysis of yarn as well as lubricants by changing measurement accessories.

FAST

Multiple components can be analyzed in less than a minute in a single run including sample presentation.

SMART

The SpectraAnalyzer TEXTILE is an all in one instrument where connected intelligent accessories like barcode reader, printer etc. are controlled with the integrated instrument processor.

ALL IN ONE

The SpectraAnalyzer TEXTILE analytical solutions presents the analytical results of all major quality parameters of yarn as well as lubricants within 45 seconds and is easy to use.

CONNECTED

The SpectraAnalyzer TEXTILE saves all data on an integrated SQL database. Connected to the companies LAN or the internet the integrated web server enables the data access and instrument control from virtually everywhere - anytime.
